SUMMARY

Final-year Information Technology student (Mobile Computing & Smart Device Applications) with 2+ years of hands-on Flutter development experience. Builds scalable mobile applications using Clean Architecture, BLoC, Firebase, and REST APIs, with native Android integrations via Kotlin and MethodChannel. Delivered a production Flutter app during company training with a strong evaluation. Skilled at converting Figma designs into responsive, RTL/LTR-ready interfaces. Open to remote Flutter developer roles.

EXPERIENCE

Flutter Developer Trainee — Zagency (Remote)

Apr 2026 – Present

- Built and delivered Cook App, a food-delivery Flutter application, as a training project; received a strong evaluation from the team.
- Applied Clean Architecture and BLoC state management across the codebase; integrated Firebase (Auth, Firestore) and REST APIs.
- Implemented localization and a responsive UI matching Figma specifications.

SKILLS

- **Languages & Frameworks:** Dart, Flutter, Kotlin, Java, Swift (working knowledge)
- **Architecture & State Management:** Clean Architecture, BLoC/Cubit, Provider, GetX, GetIt (DI)
- **Backend & Services:** Firebase (Auth, Firestore, Storage, FCM, Analytics), REST APIs
- **Native Integration:** MethodChannel, Foreground Service, UsageStatsManager, Android Studio
- **UI/UX & Design:** Figma, Adobe XD, Material Design 3, Responsive Design, RTL/LTR support
- **Tools:** Git & GitHub

PROJECTS

Cook App — Food delivery app · Flutter, Firebase, Clean Architecture, BLoC

Client training project for Zagency; authentication, localization, responsive UI. github.com/Ahmad-alnahal/cook_app

QR Tap — Restaurant ordering platform (customer + admin) · client project, code confidential

QR-based table sessions, order and reservation management.

Qwaeid — Legal reference platform · Flutter, Firebase

PDF viewer, authentication, and a full Arabic RTL interface for browsing legislation and case studies. github.com/Ahmad-alnahal/Qwaeid

Rotate Rules — Android utility · Flutter, Clean Architecture, BLoC, MethodChannel

Controls per-app screen rotation behavior using a foreground service and native Android APIs. github.com/Ahmad-alnahal/rotate_rules_app

EDUCATION

B.Sc. Information Technology — Mobile Computing & Smart Device Applications — Islamic University of Gaza (IUG) 2021 –

Present (Final Semester)

CERTIFICATIONS

- The Complete Flutter & Dart: Basics to Advanced [Arabic] — Udemy, Jan 2026
- Flutter Clean Architecture [Flutter 3] — Udemy

LANGUAGES

Arabic — Native | English — B2 (Reading/Listening), B1 (Writing/Speaking)
